DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3 are drawn to a solder joint structure, classified in class 428, subclass various.
- II. Claims 4-6 are drawn to a method of soldering, classified in class 228, subclass 180.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a process where the soldering occurs simultaneously.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

During a telephone conversation with Anthony Curtis on 1-25-05 a provisional election was made without traverse to prosecute the invention of Group II, claims 4-6. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-3 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anthony Curtis on 1-25-05.

The application has been amended as follows:

Cancel nonelected claims 1-3.

Claim Allowance

Claims 4-6 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not suggest or teach a method of soldering an electronic component, particularly after heating, forming a second solder section having Sn-Zn solder material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
